Summary

Experienced Front-End Developer with almost three years of hands-on expertise. I specialize in translating design concepts into user-friendly interfaces. Collaborative and adaptable, I thrive in fast-paced environments, consistently delivering high-quality projects that exceed user expectations. Eager to contribute my skills to innovative web development initiatives.

Skills

JavaScript • TypeScript • Reactjs • Nextjs • Redux • PWA • Css / Sass • version control : (Git)

Css frameworks : (Tailwindcss / MUI / Bootstrap / React bootstrap)

Professional Experience

Front-End developer, vardda [🔗](#)

sari, Iran

Projects

Xreply, Technologies : *React.js, TailwindCss, react-tweet library* [🔗](#)

- Developed a demo web application, xreply, using React.js and Tailwind CSS to enhance the Twitter experience for users.
- Enables users to seamlessly reply to others' tweets with a user-friendly interface and optional emotions.
- visit online : <https://xreply-client.vercel.app>

User Portfolio, Technologies: *React.js, TailwindCss* [🔗](#)

- Developed a personal website portfolio showcasing user abilities, skills, education, and projects.
- Designed and built the site using ReactJS and Tailwind CSS for a responsive and visually appealing user experience.
- Included sections highlighting the user's professional background, projects, and educational qualifications.

Axies-NFT-Market-Place: My JavaScript Debut [🔗](#)

Technologies: Javascript, sass

- Axies-NFT-Market-Place is not just a project; it's my JavaScript initiation. As my first venture into pure JS development, this marketplace is dedicated to showcasing animated monsters as Non-Fungible Tokens (NFTs). It represents my passion for merging creativity with code, setting the stage for future innovative projects.
